Summary

Computer Science undergraduate specializing in Cybersecurity, with hands-on experience in system-level and security-focused projects. Actively practicing Data Structures and Algorithms in C++, with strong foundations in Operating Systems, Computer Networks, and DBMS. Seeking core software and systems-oriented roles.

Education

Bennett University, Greater Noida, India

2023 – Present

Bachelor of Technology in Computer Science and Engineering (Cybersecurity)

Projects and Research Experience

Data Leak Detection System (DLDS)

Python, Linux, File System Monitoring

- Developed a Python-based system monitoring 100+ file access events per session in real time
- Implemented IP and MAC-based access control across 3+ test endpoints to prevent unauthorized access
- Built centralized logging mechanisms generating audit logs for every file modification and access attempt
- Improved data access traceability by 100 percent through structured monitoring and alerts

VANET Security Research (PUF-Based Authentication)

Vehicular Networks, Security Protocols

- Engineered a secure communication model for VANETs using PUF-based authentication
- Integrated segmented message transmission with Selective Repeat ARQ to reduce retransmission overhead
- Evaluated protocol behavior across multi-hop vehicular communication scenarios
- Authored a research manuscript currently under academic review

Android Malware Research

Mobile Security, Threat Analysis

- Analyzed Android malware samples across multiple threat categories including data exfiltration
- Contributed to threat modeling and AI-based malware detection strategy formulation
- Presented findings at Mobilon competition and secured 3rd place among competing teams

Management System

Java, SQL

- Architected a Java-based management system supporting CRUD operations across 5+ database tables
- Implemented SQL transactions ensuring data consistency under concurrent operations
- Optimized relational schema design for structured reporting and query performance

Technical Skills

- **Programming:** C++, Java
- **Core Computer Science:** Data Structures and Algorithms, Operating Systems, Computer Networks, DBMS
- **Systems and Security:** Linux CLI, Access Control, Logging and Monitoring, Network Scanning
- **Security Tools:** Nmap, Amass, Subfinder, Dirb, Dirbuster, EyeWitness
- **Web Basics:** HTML, CSS, JavaScript

Coursework

- Data Structures and Algorithms
- Operating Systems
- Computer Networks
- Database Management Systems

Achievements

- Secured 3rd place in Mobilon competition for Android Malware Research
